NOTE FOR: Mr. Wattles

I have read only the top portion, the final report so-called, and not the attachment. I made one penned note, but I am wondering if you would pick up the ball on this one and see what we can do about putting this in the form that we can indeed circulate it. I have separately commented on the redo which [] was kind enough to do for me on my final remarks. I think that we should try and get this thing out both here and in perhaps a more summary form to the people who are overseas. But really equally important I believe is that we show some action even if it is on a very limited scale. I think there are a couple of things to do with the panels and procedures or results which might most readily lend themselves to quicker decisions and actions. If you could consult appropriately and then come back with some things that we could move on, I would be very appreciative.
